Medication Picture Reminder

RxAlert

Medication Picture Reminder

For iOS and Android

Need a reliable means of reminding yourself to take your medications on time?

Need to keep track of multiple medications?

Need to make sure you take the right medication at the right time?

Need to choose between a picture, a sound, or both?

Need a means to remind you of appointments and refills?

What does it do?

Lets you take pictures and associate pictures with texts and alarms.

When the alarm goes off, you see pictures and texts. You will also hear sounds.

Alarms can be set to repeat multiple times on a given day or periodically (daily, weekly)

Alarm times can vary on different days
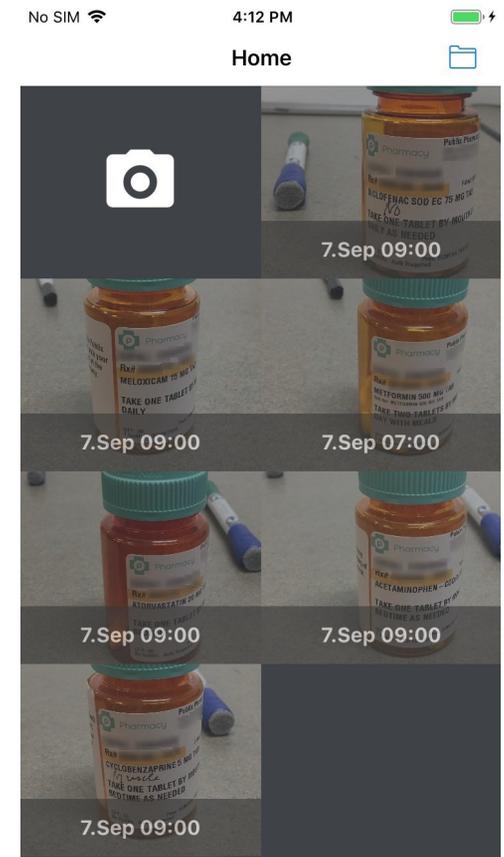

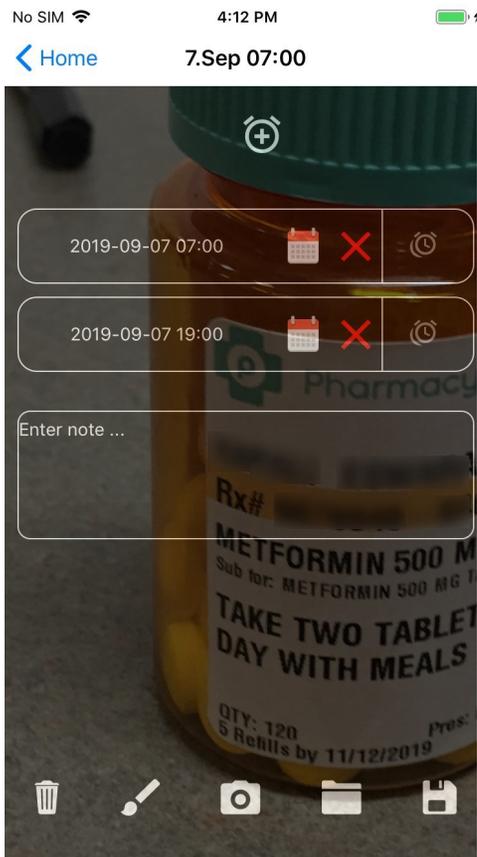

Alarms can be silenced

RxAlert Medication Picture Reminder helps patients, pharmacies, and hospitals

Strengthen relationships between patients and pharmacies

The RxAlert Medication Picture Reminder app is a great way to let your patients know you care about their well-being. It tells your patients that you want to make it easier for them to get healthy and stay healthy.

Reduce readmissions to the hospital

As patients get better at taking their medications, they become less likely to be readmitted to the hospital. This compliance is a big win for hospitals as patient readmissions get reduced and revenue increases.

Remind patients of appointments and medication refills

RxAlert Medication Picture Reminder can be used for more than just taking medications; it can be used for reminding patients about scheduled appointments as well as to get their prescriptions refilled, and anything else that the patient needs to remember that is related to their care.

Increase the productivity of your staff

RxAlert Medication Picture Reminder app could answer patients' questions like when and what medication to take and whether to take a prescription with or without food. Your staff can spend their time on other tasks.

Have the data at your fingertips to perform medication therapy management (MTM)

RxAlert Medication Picture Reminder app enables better MTM services by providing pharmacy staff with all medications that the patients are taking.

Make it much easier to perform medication reconciliation

By tracking all of the medications a patient is taking, RxAlert Medication Picture Reminder app makes medication reconciliation process easier and better at the time of admission to hospital.
